Meet Clouds Dubai at GISEC 2026

Stand No- P21, Hall 5, Dubai Exhibition Centre, Expo City, Dubai (September 16–18)

We are delighted to announce our participation in **GISEC 2026**, the Middle East's premier cybersecurity exhibition. Visit **Clouds Dubai at Stand P21, Hall 5**, where we will showcase advanced cybersecurity solutions alongside our strategic technology partners: **WALLIX, LibraCyber,** and **DataResolve**.

Our cybersecurity consultants will be available throughout the event to demonstrate innovative solutions addressing some of today's most critical security challenges—from advanced email protection and endpoint data leakage prevention to privileged access security for IT and OT environments. Discover how our solutions can help your organization strengthen cyber resilience, protect sensitive data, secure privileged access, and meet evolving compliance requirements.

For more information about our stand, please visit https://exhibitors.gisec.ae/gisec-global-2026/Exhibitor/ExbDetails/clouds-dubai

LibraCyber – Comprehensive Email Security Beyond the Gateway

Protecting Communications. Preserving Trust. Ensuring Compliance.

Email remains one of the most frequently exploited attack vectors in today's evolving threat landscape. LibraCyber provides a comprehensive suite of email security solutions designed to protect organizations against phishing, malware, spoofing, Business Email Compromise (BEC), impersonation, and other advanced email-based threats.

LibraCyber Email Security: A next-generation, integrated email security platform delivering multi-layered protection for Microsoft 365, Google Workspace, and Microsoft Exchange environments. By combining gateway-level protection with API-based security, the platform provides real-time threat detection and response through a unified interface—reducing complexity and strengthening organizational resilience.

LibraCyber Email Archiver: Ensure the long-term accessibility, integrity, and regulatory compliance of your organization's email communications. The solution creates a complete, one-to-one copy of every message, regardless of whether the email environment is cloud-based or on-premises. Native integration with Microsoft 365 and Exchange, together with an intuitive Outlook Add-in, enables users to retrieve archived emails easily from both Windows and macOS devices.

LibraCyber PhishBrain: Empower employees to recognize and respond effectively to phishing attacks with an intuitive phishing simulation and security awareness training platform. PhishBrain helps reduce human-related cyber risk by building a stronger and more security-conscious organizational culture.

LibraCyber LetsDMARC: Gain complete visibility and control over your email domains with LetsDMARC. This comprehensive DMARC management and reporting solution helps prevent domain spoofing, improve email deliverability, and protect your organization's email reputation.

WALLIX – The Future of Privileged Access Management for IT & OT

Securing Identities. Enabling Access. Empowering Compliance.

As organizations accelerate their digital transformation, securing privileged accounts with elevated access to critical systems has become more important than ever. WALLIX, a global leader in Privileged Access Management (PAM), delivers simple yet powerful solutions that protect sensitive systems against unauthorized access, credential misuse, insider threats, and cyberattacks.

WALLIX Bastion – PAM Made Simple

WALLIX Bastion provides centralized control over privileged credentials, user access, session monitoring, and approval workflows. Whether access is required by administrators, third-party vendors, or automated processes, WALLIX ensures that only authorized users can connect to critical systems—and only when necessary. Easy to deploy and intuitive to manage, WALLIX Bastion helps organizations strengthen security, improve operational control, and meet compliance requirements.

WALLIX PAM4OT – Industrial-Grade Access Control

WALLIX PAM4OT is purpose-built to secure Operational Technology (OT) and Industrial Control System (ICS) environments. It helps critical sectors—including manufacturing, energy, utilities, and transportation—align with standards and frameworks such as **ISA/IEC 62443** and **NIST SP 800-82**. Key capabilities include secure remote access, strong multi-factor authentication, just-in-time access, privileged session monitoring, and comprehensive session recording. These capabilities help reduce cyber risk while maintaining operational continuity and efficiency.

Recognized by leading analysts, including Gartner and Frost & Sullivan, for its simplicity, cost-effectiveness, and feature-rich architecture, WALLIX continues to be a trusted choice for securing privileged access.

DataResolve inDefend – Data Leakage Prevention, Data Classification, Productivity Monitoring & DSPM

Combat Insider Threat Intelligently with inDefend.

inDefend provides an integrated approach to **Data Loss Prevention (DLP), Insider Threat Management, User and Entity Behavior Analytics (UEBA), Employee Productivity Monitoring, Data Classification,** and **Data Security Posture Management (DSPM)**. The platform helps organizations monitor user activity, identify abnormal behavior, prevent data theft, protect sensitive information, and improve workforce productivity.

inDefend creates a controlled environment for the movement of information across multiple communication channels, applications, and portable storage devices. Through customizable access policies and real-time visibility into data transfers, organizations can detect and prevent unauthorized data exposure before it results in a serious security incident. Its intelligent reporting capabilities provide proactive warnings about potential data leakage through real-time notifications, alerts, SMS, and email—enabling security teams to identify, investigate, and block suspicious activity quickly.
